Purpose of Flight:	Science		
Comments:	This flight was over the Gulf of California, and was our first overflight of Mexican territory. Weather was clear for the first half of the flight, but increasing clouds over the southern-most part of the satellite flight track prompted an early turn so that the aircraft would be in clear air for the satellite coincidence. SHIS and NAST-I had problems during part of the flight. But fortunately, all instruments were functioning during the satellite overpass.
